

Two-day re-tuning added up to 2.5× over the previous best WMMA kernels

Prefill GEMMs of Llama 1B / 3B / 8B, M = 2048, texture3d (model path); bars = geomean of 12 shapes

■ previous best WMMA (= 1×) ■ gain from re-tuning — per-shape range ○ 1B □ 3B △ 8B

† previous WMMA kernel was opt-in; the default path ran tiled. ‡ B580 before = B70 branch's Xe2 tiles.
3 repeats per cell; Orin 4w bar = 11 shapes (8B w2 original numerically invalid).
